

**November 21,2020**

**Report  
On  
Engineers -The Backbone for Nation Development**

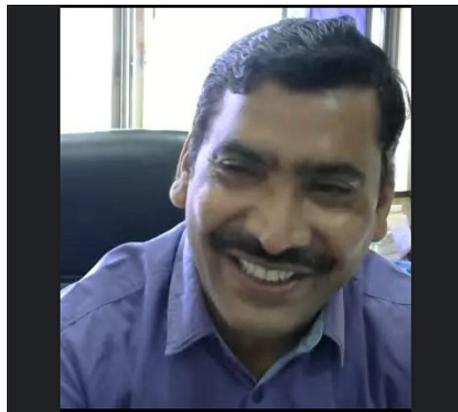

Under the guidelines and directives of Director of Technical Education and the ministry of Higher and technical education, Government of Maharashtra on the current volatile situation in the state as well as in the country, it was decided that this academic year 2020-21 will start online.

Keeping the circumstances in mind we decided to organise an event, a webinar to keep the students active and give them a chance of interacting with this session. The event was organised on November 21,2020 by Team Sankalp. And with the support of Honorable Director Professor Y.V.Joshi we decided to have this motivational talk.

To keep up the spirits of all our engineers we decided to reach out to Mr.Prasad Chikshe sir. Sir has worked very closely with Amir Khan in paani foundation and with Shri Anna Hazare during their first hunger strike against corruption at Alandi. He has won multiple awards in his life course.

To start the session we had Professor Dr. Arun Patil sir, Dean of Student Activities SGGsIE&T. In Prof. Arun Patil Sirs speech he appreciated for organizing this event. He further talked about Mr. Chikshe Sirs work and gave a brief detail about how we can grab things to learn from him.

He also invited our Director Sir, Dr. Y.V. Joshi sir to say a few things.

Dr.Y.V.Joshi sir addressed the situation or pandemic and talked about Chikse Sirs work and how his work has inspired us all.

After his words Mr.Chikshe sir enlightened us. Sir said that our personality, confidence can developed by working with society or by being in contact with society. It keeps a person down to earth and grounded to reality.

In order to attain peace of mind and to increase our mental abilities an individual should be physically fit. Life is a balance and we should balance all our aspects of life. We should be honest to ourself inorder to be truly successful .

There are numerous chances and opportunities open for us after engineering, whatever we desire to do. To pursue a thing will power is enough and we can achieve anything we want.

Our duties and responsibilities towards society should always be taken care of. We should work something for the welfare of society no matter what the work is big or small. Our contribution to the society is an investment for betterment of the surrounding we live in.

He further narrated a his own life incident in the form of a story. In his story there was a village. The

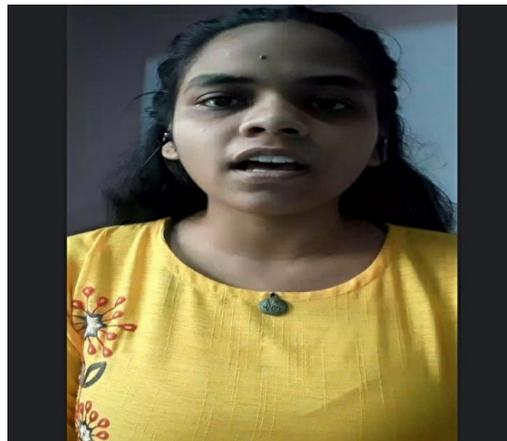

people of this village had its own liquor business. People were so into that business that it spared no one, not just the elders of that village but also the younger ones were involved. Sir was once invited by the villagers at around 10:00 pm, the reason of calling him late at night as described in his story was that people of that village were scares during the day which was a bit weird. Sir managed to reach the village a bit late at night at 1:00 am.

After reaching there without wasting much time they held the gramsabha and called out all the women to discuss the liquor business problem that was affecting so many lives of the village. Not just affecting but so many families were getting in some sort of problems be in financial crisis or addiction. To help these people out sir suggested a solution by giving some sort of work and task of the women to which they agreed.

And from that day on they have started working in a right direction without getting caught in problems that could spoil their and their families life.

In order to live a better life work in the right direction with dedication.

After his speech ended a song was sung by Priya Kishor Kshirsagar in her melodious voice.

At the end of the session President of Team Sankalp Piyush Patil gave the Vote of Thanks.

The Program Ended with the Vote of Thanks offered by Mr. Angad Singh Sena who is the key person behind arranging this program.
